Introduction

This test plan has been developed to test the business and functional requirements of your merchant-supplier relationship and to teach new users how to interact with the Rithum network. To support partner testing, Rithum will load orders into your test account that follow the conditions defined within this plan. You are expected to complete the entire test plan by following the procedures outlined for each test case.

Integrated Partner Connections

Integrated partners will receive orders electronically. Depending on your setup configuration, you will process all required transactions electronically or by logging into the Rithum web application test environment to perform certain functions required within each test case. Integrated partners are enrolled in courses in [Rithum Learn](#). This interactive, on-demand business and system training resource teaches new users how to interact with the Rithum network and how to follow business and functional requirements of your merchant-supplier relationship.

Browser Partner Connections - Web Application Users

Browser partners are enrolled in courses in [Rithum Learn](#). This interactive, on-demand business and system training resource teaches new users how to interact with the Rithum network and how to follow business and functional requirements of your merchant-supplier relationship. Users can browse topics and complete courses that'll help you to work with your trading partners on the Rithum network and meet their business requirements.

Test Condition Notes

The test cases presented in this document only present a subset of the information included in the test orders (i.e., not all fields are represented within the test case). The representation of the test cases does not represent the format or appearance of the associated packing slips.

Helpful Hints

- **Hint 1:** Identify each test case by comparing the Ship To address information in the order with the test case.
- **Hint 2:** Clicking on the PO Number link will display the **Order Detail** page on the web application.
- **Hint 3:** Record the PO Number to make it easy to find the order when processing a return or submitting an invoice.
- **Hint 4:** Not all features apply to all retailer-supplier relationships. Columns that are shaded in gray do not pertain to the retailer relationship.
- **Hint 5:** To complete each test case, follow the steps in the *Supplier Action* column of the test case.

Supplier Action	Web application users should refer to HubHelp for information about:
Receive	Downloading orders and packing slips
Ship Order	Processing orders
Cancel Order	Processing orders or canceling an order
Invoice	Submitting an invoice
Receive Return	Returning an item
Reprint Packing Slip	Printing a revised packing slip
Inventory	Updating inventory data

Entering Information

Ship Method Codes	Enter a valid shipment method code. Web application users should use the drop-down menu to select an appropriate shipment method.
Tracking Numbers	Enter an example of a valid tracking number for the selected carrier (i.e., if using FedEx enter an example of a FedEx tracking #).
Number of Boxes	When processing an order, you will need to identify the number of boxes that are being used to ship the order. Unless otherwise instructed enter as many or as few boxes as you prefer.
Cancel Reason Codes	Enter a valid cancel reason code when requested. Web application users can use the drop-down menu to select an appropriate reason.
Return Reason Codes	Enter a valid return reason code when requested. Web application users can use the drop-down menu to select an appropriate reason.

Legend	Description
Test Case	Identifies the test case number.
Description	Provides a description of the test case and the actions to be performed.
Notes	Highlights any characteristics of the test case that should be noted when performing the required steps.
Ship To	Identifies the Ship To name and address within the order. Can be used to associate the packing slip to the test case.
Bill To	Identifies the Bill To name and address within the order.
Order Information	
Merchant Line	Identifies the merchant line number that appears within the order. Note, these will not always be sequential or begin with 1.
Order Qty	Identifies the quantity ordered for the associated merchant line.
Messages & Indicators	
Order Level Message	Identifies if an order level message is included in the order (if applicable to the retailer relationship).
Line Level Message	Identifies if one or more line level messages are included in the order (if applicable to the retailer relationship).

Legend	Description
Indicators	Identifies if any special indicators are used within the order (if applicable to the retailer relationship).
Step	Identifies the activities to be performed by the supplier in exercising the test case.
Supplier Action	Identifies the action to be performed by the supplier for the associated test case step.
Message Type	For integrated partners - identifies the expected message type to be used to accomplish the test case step.
Line	Identifies the line(s) within the order that the step pertains to.
Ship Qty	Identifies the quantity to be shipped in the associated test case step.
Cancel Qty	Identifies the quantity to be canceled in the associated test case step.
Backorder Qty	Identifies the quantity to be backordered in the associated test case step (if applicable to retailer relationship).
Qty Invoiced	Identifies the quantity to be invoiced in the associated test case step.
Qty Returned	Identifies the quantity to be returned in the associated test case step (if applicable to retailer relationship).
Description	Provides a description of the test case step.
Order State Following Action	Identifies the Rithum order state following the completion of the step.

Important: Not all elements of the test case may be applicable to the Retailer/Supplier Relationship.

Test Cases

Test Case: 1
Description: Single Line Order
 Supplier Ships Entire Order

Notes: Different Ship-to and Bill-to addresses
 Suppliers may optionally include an invoice number in the Confirm message.
 This order has a Preferred Arrival Date & Gift Message.

Suppliers are expected to pay attention to Estimated Ship Date
 and Expected Delivery Date while fulfilling the order.

Test Case: 10
Description: Single Line Order with LTL Carrier Assignment
 Supplier Ships Line 1

Notes: Carrier code is an LTL value and certain values may trigger the carbon copy process, which will also deliver a copy of the PO out to the LTL carrier. If a line-haul carrier is used to transport goods to the last-mile delivery agent, it's important to include the carrier and tracking number in the integrated LSR message.

Test Case: 12

Description: Supplier will set up warehouse locations and upload inventory data. The Warehouse IDs used must match the IDs in any integrated inventory file submitted.

Notes: After loading data, supplier should verify inventory data using the web application interface.

Step	Supplier Action	Message Type	Line	Ship Qty	Cancel Qty	Backorder Qty	Qty Invoiced	Qty Returned	Description	Order State Following Action
One	Set Up Warehouses	Inventory							Using your production Rithum account, set up warehouse locations. If you are new to the Rithum network, your Onboarding Representative will set up your warehouses on your behalf.	
Two	Upload Inventory File	Inventory							Upload inventory advice file with actual Supplier data.	
Three	Modify Inventory Data	Inventory							Modify one SKU marking it as 'Discontinued'.	
Four									Verify inventory data using the web application.	

Test Case: 13

Description: Supplier Creates SKU Attribute Data Details for LTL Products

Notes: This is **only required** for those suppliers who are identified as an LTL product supplier.

Step	Supplier Action	Message Type	Line	Ship Qty	Cancel Qty	Backorder Qty	Qty Invoiced	Qty Returned	Description	Order State Following Action
One	Item Setup	SKU Content							Using the web application, set up vendor set SKUs as needed to support the LTL program.
